## Maintenance Matters

### Work Orders

There are lots of times techs will go to a store and upon arrival, the issue is already fixed. Dennis and Kevin have made emergency trips 3-4 hours away only to get there, and the help desk already helped the store. The store should cancel the work order or at least call them, so they don't drive all the way for no reason. This happens with a lot of things.

Put pictures for just about everything. Vendors ask for pictures 99% of the time. This saves a lot of back and forth.

### Frymaster Fryers

Majority of the problems are due to employee errors with incorrectly installed or torn filter paper resulting in restricted filter pump lines. Probes need to be cleaned so that the fryer will know if oil is in the fryer or not. When grease is caked on the probe, the fryer thinks it has oil in it when it doesn't. This is the cause of most of the fryer fires.

### Steamer Paddles and Evo Doors

Don't put Evo doors in power wash sink as it scratches the doors up on the Plexi glass.

Don't put the steamer paddles in the power wash sink as it bends the metal on the ends of the paddle. This causes the paddle to not be able to reach the back of the machine to kick it on. CORE also takes off points for damaged paddles.

### Floor Tiles

Don't pour Bunn hot water on the tiles to clean. Employees can get burned. The grout will start to disintegrate faster with the hot water hitting it as well. Don't soak the floors with hoses. This causes water to soak under the tiles causing water to sit and stink. The water also starts to seep back up through the grout and tiles.

### Proluxe Split Lid Toasters

The control boards are the weakest point on these grills. If any moisture enters the control area, the board will fail. The drip trays cannot overflow with water while cleaning and must remain dry because if there is any moisture in the drip tray, it will evaporate then cause condensation onto the control board. Don't pour cold water directly on the hot Toaster as that is what causes the plates to warp.

### Griddle and Tortilla Warmer

Don't pour cold water directly on the griddle; it will warp.

# YOU HAVE A VOICE!

Employees can text anytime they feel they have been treated unfairly, harassed in any way including sexual, to speak about unsafe work conditions, or have any issues with pay or being paid properly and on time.
